## ACKNOWLEDGMENTS

This edition of the North American Blue Book is largely based on two previous editions: one assembled by the Louisiana current, made possible with tremendous efforts of research and translation by many Daimistas in both North America and Brazil; the other by the Oregon current, which included important additional liturgy, but fewer translations. We also made much use of the festival hinários published by both the D.C. and the Oregon currents, the combined *Concentração/Despachar* folio published by the Los Angeles current, and the *Trabalho de São Miguel*, composed by members of the D.C. current under the guidance of Padrinho Alfredo.

The reasons for creating this additional edition is that we wanted to have a teaching tool, for our new members here in St. Louis, that would be comprehensive, that would conform more closely with the *Normas de Ritual*, and whose English translations would make a little better sense and flow than the valiant efforts of the previous editions (and we developed translations for many hymns and prayers previously untranslated). A final reason was to have an online edition that is easy to print dual-page, double-sided on 11"x8.5" paper. A further feature was to compose each section as a separate folio which could be removed from the binder.

This edition also contains our selection of supplemental hymns for the Concentration, Serving, Closing, the St. Michael work and the Special Occasion sections – feel free to replace these with your own choices (just be careful how the pages back up to each other).

Please tell us of any corrections, improvements or additions we could make:
